

# Petroleum Equipment Inc.

What we do goes beyond installing and maintaining mission-critical fuel systems. In our line of business, there is no room for failure.

**Excellence is all we have to offer.**

## 90 Years of Excellence

Our systems are designed to **protect the environment and end-users**, safeguarding them from leaks, fire, and contamination. To prevent future complications, our experts are well-versed in the various **regulations, statutes, and environmental codes** that must be followed.

## Why Choose PEI?

- +** Our personnel are OSHA trained, State and manufactured certified to install and service storage tanks, piping, and tank electronics.
- +** We provide ancillary services (such as tank cleaning and inspections) to solve problems before they surface.

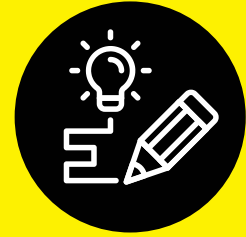

### Tank Installation/Removal

*Certified and licensed to install and remove above and underground petroleum and chemical systems in Wisconsin and Illinois.*

### Regulatory Compliance

*Tank Monitor Functionality Verifications; sump and spill container testing; make repairs as required by State inspection reports.*

### Bid-Spec | Design/Build

*We develop concise submittal documents and O&M/owner-focused documentation. We design, document, install and service turnkey installations.*
